

How to Use the Interactive Map

Step 1 - Locate interactive map link on ASD transportation page

Step 2 - Click on interactive map link

Step 3 - Note all red highlighted roads on the interactive map indicate non travel roads during limited transportation

Step 4 - Note Blue snowflakes indicate designated alternative bus stops for non-traveled roads

Step 5 - Identify if your bus stop is located on a non-traveled road and select the nearest designated alternative bus stop your student is safely able to access.

Step 6 - Students should arrive at the limited transportation alternative bus stop based on the district announced delayed start time. For example, on a two-hour late start day, students should arrive at the alternative stop two hours later than their normal stop time at their regular bus stop.
